

What's New in ERP V13.1.0

Following details in this release.

All issues

Please refer to the Release Notes below for full details on all issues addressed.

Module	Component	Number	Type	Release Notes
Accounts Payable	Supplier Maintenance	22742	Software Defect	An issue has been resolved whereby non-system users did not have access to the Sub-contractor insurances fields.
Job Costing	Invoicing - Goods and Services	22744	Software Enhancement	An enhancement has been made to the Goods & Services invoice entry, now displaying and allowing users to modify the invoice DUE DATE field. Previously, this date was calculated based on client terms and type but was hidden from the invoice entry form.
Job Costing	Invoicing - Progress Claims	22745	Software Defect	An issue has been resolved, whereby the Due Date was not getting set on the invoice header, which affected the transaction search, when using Due Date as a search criteria.
Job Core	Job Selection Filter	22746	Software Support	An enhancement has been made to the Job Core functionality, enabling users to search for jobs by clicking on the 'Jobs' heading in the left-hand side tree menu. A 'Job' search and select popup window will appear, allowing users to choose the desired job to view its details.
Payroll	Employee Maintenance	22689	Software Defect	An issue was found where Terms of Employment drop down menu displayed no data, this issue has now been fixed.
