## Zavanti Newsletter March 2014

### Clients

I am pleased to welcome our new clients

- [Branson Group](#)
- [Horizon Housing](#)

### ERP

Our latest version of Zavanti ERP (10.2.1) is now available for download and upgrade. This release includes a number of fixes and functional improvements and builds upon the capabilities from the previous 10.2 release, which contained the following major enhancements:

- Cash based tax and transaction reporting
- Email pdf from payment runs, payslips and PAYG certificates
- Ability to copy a forecast and maintain history of forecasts
- Option for fixed assets depreciation cost base to be adjusted
- New attachment function with Vouchers
- Create Landlord statements.

An overview of these changes is available for review from our website. Detailed Release Notes are available for download.

### CRM

This solution now has full mobile access with the upgrade to Microsoft Dynamics 2013 platform. Our solution has now been significantly enhanced with additional Property Management functionality.

This newsletter has been brought to you using our solutions enhanced marketing capability and is available through our integration with Click Dimensions.

- Process Driven Interface from maintaining asset to work orders
- Data visualisation with charts and dashboards
- Powerful workflow engine to automate maintenance request approvals
- Automate CPI/rent reviews as per lease agreement
- Upload Lease/Rental agreements, exit lease reports etc.

### LUNCHTIME WEBINAR

Join us for a webinar over lunch to review key functions and new capabilities in ERP and our CRM modules. We will also provide an opportunity to discuss our plans for future developments, such as revamp of our look and feel.

**When – Wednesday 9 April 2014 at 1pm (EST)**

### Register for Webinar

After registering you will receive a confirmation email containing information about

joining the Webinar  
**Space is limited.**

Regards

Ian Plater  
Chairman
